## Versioner

Version	Date	Author	Organization	Comment
1.00	2014-08-25	Thomas Pettersson	SFTI Tekniska kansli	Adjust "PEPPOL BIS 1A Catalogue v4" to Svekatalog 2.0

## 1 Background

The PEPPOL BIS 1A Catalogue v4 document provides a specification for implementing Catalogue and Catalogue Response messages, which both are mandatory in the “PEPPOL BIS 1A Catalogue Only” profile.

After a round of consultation SFTI Beredningsgrupp concluded that Catalogue Response, as it is specified today, is unsuitable as a mandatory message in Swedish public sector. Therefore, SFTI has asked CEN BII3 and OpenPeppol for a new profile excluding Catalogue Response. Awaiting a new profile, SFTI Beredningsgrupp decided to recommend the Catalogue message as a new version of Svekatalog.

SFTI styrgrupp (steering group) decided February 20<sup>th</sup> 2014 PEPPOL BIS 1A Catalogue v4 **excluding** Catalogue Response, as Svekatalog 2.0.

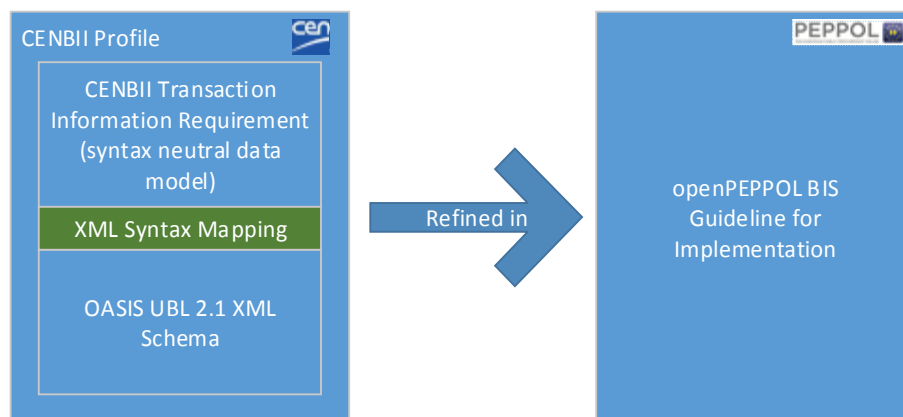

This document provides specification for Svekatalog 2.0. It follows the Catalogue message parts of PEPPOL BIS 1A with minimal adjustments (like ProfileID and CustomizationID).

Parties may bilaterally decide to use this document, but not to be used within the OpenPeppol infrastructure, unless they decide to additionally support the complete PEPPOL BIS 1A profile.

## 2 Introduction to OpenPEPPOL and BIS

A BIS is a result of work within OpenPEPPOL and is published as part of the PEPPOL specifications.

This document provides a specification for implementing part of a PEPPOL business process (Catalogue but not Catalogue Response). The original PEPPOL BIS document is concerned with clarifying requirements for ensuring interoperability of pan-European Public eProcurement and provides guidelines for supporting these requirements and how to implement them and is based on the CEN WS/BII2 “Profile BII01 Catalogue Only”.

### 2.1 Audience

The audience for this document is organizations wishing to exchange electronic catalogues, and/or their ICT-suppliers. These organizations may be:

- ▶ Service providers

- ▶ Contracting Authorities
- ▶ Economic Operators
- ▶ Software Developers

More specifically it is addressed towards the following roles:

- ▶ ICT Architects
- ▶ ICT Developers
- ▶ Business Experts

## 4 Principles and prerequisites

### 4.1 Business Process in scope

This specification supports a process for suppliers to send a catalogue. It is intended to support transmission of electronic catalogue-messages for processing in semi-automated processes by the receiver. The specification mandates no procurement related data but supports different ways of referring to products and services. By selective use of such references it can be used as basis for automated processing of ordering and invoicing.

The intended scope for the specification is:

- ▶ B2B and B2G
- ▶ Common business processes for cross industry and cross border procurement
- ▶ Regional procurement within EU and EEA
- ▶ For supporting purchase of goods and services and/or services that can be itemized.

This specification supports a set of “common use cases / process”. These are processes that are used widely or understood as being relevant for most companies.

The main activities supported by this specification are:

- ▶ Description of goods and services
- ▶ Maintaining content of framework contract
- ▶ Item comparison
- ▶ Item dependency and composition
- ▶ Description of packaging and storage requirements
- ▶ VAT classification
- ▶ Item instance description
- ▶ Maintenance of catalogue

This specification supports requirements by providing elements for information needed to meet the requirement. This specification also provides a set of business rules to clarify content and implementers can use them as basis for validation where it provides business value.

### 4.2 Catalogue - Benefits

Catalogues are used as basis for maintenance of information about products and services that are part of a contract, like a framework agreement.

- ▶ The buyer (or a catalogue provider on his behalf) can present the information in a web shop where he can ensure correctness of product description, prices and other terms that may apply.
- ▶ The supplier can provide the customer with correct information at all times and ensure high data quality in orders based on the catalogue he prepares.
- ▶ Implementing the catalogue provides the possibility of designing fully automated purchasing flows in which the electronic documents can be validated and matched automatically, thereby saving resources compared to manual processing.
- ▶ Implementation of a catalogue can be the first step in automating the purchasing process followed by an order and an invoice, leading to entire purchasing process running from sourcing, ordering and invoicing to payment.

This specification is based on the CEN/ISSS WS/BII2 Profile BII01 specification, see [BII\_Catalogue], but with the exclusion of Catalogue Response message.

### 4.3 Parties and roles

Business partners	Description
Customer	The customer is the legal person or organization who is in demand of a product or service. Examples of customer roles: buyer, consignee, debtor, contracting authority.
Supplier	The supplier is the legal person or organization who provides a product or service. Examples of supplier roles: seller, consignor, creditor, economic operator.
Role/actor	Description
Catalogue Provider	Represents a party sending catalogues to receivers, being the supplier or on behalf of the supplier. The Catalogue Provider has to ensure that the latest catalogue is sent to the receiver.
Catalogue Receiver	Represents a party receiving catalogues and maintaining or updating them as appropriate.
Buyer	The buyer is the legal person or organization acting on behalf of the customer and who buys or purchases the goods or services.
Seller	The seller is the legal person or organization acting on behalf of the supplier and who sells goods or services to the customer.

The following diagram links the business processes to the roles performed by the Business Partners:

## 5 Business requirements

### 5.1 Process requirements

ID	Requirement
bpr01-071	The catalogue should be regarded as the Sellers standing offer, and the Seller is thereby obligated to supply the catalogue items according to the terms identified in the catalogue.
bpr01-072	Catalogue transactions are subordinate to the contracts/agreements on which they are based.
bpr01-073	The Seller is obligated to provide catalogue transactions updating items when item attributes change in the targeted catalogue, according to agreements.
bpr01-075	A receiver must implement a transaction if it conforms to an agreement.
bpr01-055	The Catalogue Provider sends a transaction to establish or maintain a catalogue at the Catalogue Receiver side.
bpr01-051	It is the Catalogue Provider's responsibility that data contained in the catalogue transaction is valid from a technical as well as a business point of view, as, it is the task of the Catalogue Provider to gather and to compile the data for the catalogue at the selling side.
bpr01-054	It is the Catalogue Receiver's responsibility to compile received catalogue transactions, if agreed to, into a catalogue, as it is the task of the Catalogue Receiver to incorporate the catalogue data in the procurement systems at the buying side.

Note. Please note that rejection of a catalogue transaction in this specification is dealt with under a separate process, probably a manual one.

## 5.2 Information requirements

### 5.2.1 Catalogue transaction business requirements

#### 5.2.1.1 General

ID	Requirement
tbr19-058	The transaction (catalogue) must contain all information necessary for its application i.e. it shall not rely on the availability of external references such as a centralised repository of item information. To ease the processing of a catalogue as no external data sources are needed.
tbr19-059	It must be possible to check the integrity and authentication of the information content and to audit these aspects of the content. To check that the catalogue is authentic.

#### 5.2.1.2 Header

ID	Requirement
tbr19-071	A catalogue transaction must contain an identifier for the catalogue it represents or updates
tbr19-001	An indicator for the catalogue revision may be specified. To support updating the catalogue after the first submission a revision indicator is sometimes needed to differentiate the catalogue versions. This indicator ensures the catalogue provider (CP) and catalogue receiver (CR) always refer to the correct and valid version of the catalogue.
tbr19-002	It must be possible to specify a name of the catalogue. Some catalogues have a special name used in the common communication. Sometimes the name refers to a special event the catalogue is created for.
tbr19-003	It must be possible to specify the period of time the catalogue is valid. A catalogue without a stated validity period is assumed to be valid until it is cancelled. Sometimes products are offered only for a certain period of time or the prices for the product are assured to be fixed by the CP only during this period of time.
tbr19-006	It must be possible to specify the contract on which the catalogue is based on. Sometimes a catalogue is provided according to a contract, e.g., a framework agreement (FWA). In such a FWA further requirements on the catalogue may be specified. A catalogue transaction either refers to one contract/agreement or none.
tbr19-007	The party providing the catalogue must be specified. To check, if the catalogue comes from or is sent on behalf of the right CP. The party may be the supplier or a dedicated third party acting on behalf of the supplier.
tbr19-010	The party receiving the catalogue must be specified. To check, if the catalogue sent to the same CR as specified in the catalogue.
tbr19-015	It must be possible to specify who offers the items described in the catalogue and how this party can be contacted (mail, e-mail, phone, etc.). Only one supplier is allowed to be specified. As the catalogue provider can differ from the supplier itself, e.g., the supplier outsourced all catalogue services to a catalogue provider, the supplier has to be specified as well. This party is the actual Economic Operator the Contracting Authority is doing business with.
tbr19-062	A catalogue must have information that makes it possible to reference specific instances of the catalogue.
tbr19-066	The party that sells the products that are listed in the catalogue must be identifiable with information including name, address, identifiers as well as contact information.
tbr19-067	The party that is allowed to buy the products that are listed in the catalogue must be identifiable with information including name and identifiers as well as contact information.
tbr19-075	It must be possible to specify whether a catalogue is new, to be updated or to be replaced.

## 5.2.1.3 Item

ID	Requirement
tbr19-040	An item in a Product or Service Catalogue must have a name and be uniquely identifiable by at least one single language-independent token. This includes such id provided by the CP itself as well as a manufacturer's id and an id coming from standard identification schemes. Ensure that the item can be referenced, e.g., in the order. The id can be used in the order, which makes it easier to process the order by the supplier and helps to deliver the correct item that was ordered by the buyer.
tbr19-050	It must be possible to specify how the item has to be processed by the catalogue receiver. This includes the following options: adding the item to the catalogue, replacing an existing item in a catalogue sent before, and deleting an item in a catalogue sent before. If no action is specified it has to be considered as a new item. It is intended to provide a synchronization mechanism between the catalogue of the catalogue provider and the catalogue receiver.
tbr19-041	It must be possible to specify the period of time the item is valid. If no validity period is specified, the item description is valid until it is cancelled. The same as in tbr19-003, but on the item level. This allows to have items with different validity periods in the same catalogue. Otherwise, for every a validity period a separate catalogue would need to be provided.
tbr19-018	It must be possible to refer an item to the corresponding classes from one or more classification systems. Often, the usage of a classification system, e.g., CPV, UNSPSC, eCl@ss, or GS1 GPC, is mandatory or widely used in practice. By this requirement, it should be possible to use any classification systems mandated by Contracting Authorities or legal frameworks.
tbr19-019	It must be possible to specify the (semantic) relationships and cardinalities between different items in the catalogue. In particular, it must be possible to specify part-of relationships and required (additional) items. Some items are not offered by a supplier individually. They are either only useful together with another item or refer in some manner to a specific item. Examples for such items are accessories belonging to and only applicable with another item or replacement items to replace broken components of an item. (In future version of BII other relationships may be added, e.g., replacement items, complementary items, or accessories.)
tbr19-042	It must be possible to specify, if and how an item can be ordered. This includes allowed units of measure, order sizes, minimal and maximal order sizes, etc. Due to restriction from the production process or to simplify or to limit the costs of the ordering and logistics process the order size is restricted. Thus, the buyer needs information to place a correct order that is not denied by the supplier.
tbr19-023	It must be possible to specify how the delivered items will be packaged. To indicate from which number of ordered order units this package unit will be delivered.
tbr19-029	It must be possible to specify hazard indicators for an item by any indicator system. If an item can be a danger to people or the environment, so called hazardous goods, often legal requirements demand that such items have indicators to indicate the danger that come from this item. Furthermore, such items require special handling in the logistics process.
tbr19-030	It must be possible to specify logistic conditions and other needed service information on how the item will be delivered. This includes information on maximum and minimum storage temperature, information needed for cross-border logistics processes. To define the work or services to be done for each package unit along the supply chain.
tbr19-033	It must be possible to specify the manufacturer of the item. In particular, for the case where the supplier is different from the manufacturer of the item.
tbr19-034	It must be possible to specify how the item is priced, and what VAT percentage applies. This includes factors that have influence on the price as well as relationships to other parts of the catalogue that may have impact on the price. The price is not always fixed, but dependent on many factors, e.g., order size, delivery region (down to the city level), allowance, charges, currency, etc. Prices must not be negative.
tbr19-046	The price specification must allow to compare the prices of different items within the catalogue as well as across catalogues. To allow the comparison of the price of different items. Helps the buyer to

ID	Requirement
	make the buying decision.
tbr19-048	It must be possible to specify the period of time an item price is valid. If no validity period is specified, the price is valid until cancelled. The same as in tbr19-003, but on the item level. This allows to have items with different validity periods in the same catalogue. This does not mean, that the item will expire. It only means, that after this period the item has to be ordered for a different price.
tbr19-049	It must be possible to specify a delivery location on line level, with address, city, post code, etc., so that all details on each line are dependent on this location, including price, tax and other specifications. Needed to support the buying decision, to see how much has to be paid in the end.
tbr19-035	It must be possible to provide information on the product marking, e.g., to indicate that environmental or social requirements on the item production were followed. Procurement managers need information about environmental marking applicable for a given item in order to ensure that environmental, ecological, food safety and basic human rights aspects were respected. On the other side, sales managers wish to provide this kind of information, e.g., for marketing purposes.
tbr19-043	It must be possible to specify if and when an item becomes obsolete. This allows the suppliers to indicate that an item is not produced and delivered any more or until a certain point in time. By giving this information, it is prevented that the buyer orders items that will not be delivered any more. This requirement has a different meaning than tbr19-048. Tbr19-048 concerns the validity of the price. In tbr19-043 the "validity" refers on the item, i.e., product or service, when it will not be available. This means, the item itself will not be available and delivered by the supplier any more (to any condition).
tbr19-044	It must be possible to specify a description of the item or where such a description can be found. To provide a written text describing the item. May be helpful for the buyer to order the items fitting his needs best.
tbr19-045	It must be possible to specify keywords for an item. To support searching for an item by the buyer, so that the item can be found easier and faster that fits his needs best.
tbr19-047	It must be possible to specify warranty information for the item. Sometimes suppliers offer specific warranties for their items that may be important for the buyer. Providing such information supports the buying decision.
tbr19-063	A catalogue must have information that makes it possible to reference individual catalogue lines.
tbr19-064	A catalogue line must provide for an indicator that clearly states whether the line item can be ordered according to the information given in the line.
tbr19-065	A catalogue line must provide for additional information about items in the form of attachments and external references.
tbr19-068	It must be possible to specify a manufacturing date, a best before date and an expiry date (last date when product may be used or consumed) for an item.
tbr19-069	It must be possible to specify serial numbers, batch numbers and lot numbers for an item.
tbr19-070	It must be possible to include or reference (e.g. by means of a URI) the main image for an item.
tbr19-072	In addition to part-of relationships and required (additional) items there is also a need to identify replaced item. In cases where an old item is replaced by a new one this is frequently reflected in the catalogue by deleting the old item and adding the new item. The new item should then have a reference to the old (replaced) item.
tbr19-073	Products are frequently sold with optional accessories. In addition to part-of relationships and required (additional) items there is also a need to identify these optional accessories in the catalogue.
tbr19-076	It must be possible to state the country of origin for an item.
tbr19-077	It must be possible to indicate that the item is part of a contractual arrangement.

## 5.2.1.4 Item Property

ID	Requirement
tbr19-038	It must be possible to specify any additional properties of the item not covered by the message itself. Allows to enhance the description of the item and helps this way, inter alia, the buyer to order the item that fits his needs best.
tbr19-037	It must be possible to refer an item property to any property from a product/service classification system, using standardized and predefined properties from accepted standards. Such predefined properties help to improve the description of an offered item, and thus helps the buyer to order the correct item, the item that fits his needs best.
tbr19-039	If an item property is specified, a specific value has to be specified for this item property. The specified value has to hold true for the corresponding item. The specification of a concrete value helps to ensure that the buyer orders the item that fits his needs best.

## 5.3 Specific OpenPEPPOL requirements

ID:	Business term:	Description:
	<b>HEADER LEVEL:</b>	
OP-T19-019	General payment condition	A Catalogue must support the use of general payment condition.
OP-T19-021	Buyers contact person ID	A catalogue must support the use of ID for buyers contact person. Normally used for "Your reference".
OP-T19-028	Party legal entity for provider	A catalogue must support the use of party legal entity for provider. Used to specify the legal entity of the provider.
OP-T19-029	Postal address for provider	In order to specify exactly who is the provider, the postal address for provider party must be supported in a catalogue
OP-T19-030	Party legal entity for receiver	A catalogue must support the use of party legal entity for receiver. Used to specify the legal entity of the receiver.
OP-T19-031	Postal address for receiver	In order to specify exactly who is the receiver, the postal address for receiver party must be supported in a catalogue
OP-T19-032	Issue date for referenced contract	A catalogue must support the use of issuedate for the referenced contract.
	<b>LINE LEVEL:</b>	
OP-T19-014	Maximum storage humidity	A catalogue must support the use of maximum storage humidity.
OP-T19-015	Minimum storage humidity	A catalogue must support the use of minimum storage humidity
OP-T19-016	Package volume	A catalogue must support the use of package volume
OP-T19-017	Package net weight exact	A catalogue must support the use of exact net weight for package
OP-T19-037	Package net weight approximately	A catalogue must support the use of approximately net weight for package
OP-T19-038	Dimension description	A catalogue must support the use of description for dimension. Used for differentiating dimensions with same attributeID.
OP-T19-018	Brand Name	A catalogue must support the use of brand name for an item
OP-T19-020	Minimum quantity guaranteed for delivery	A catalogue must support the use of minimum quantity of an item guaranteed in a delivery

ID:	Business term:	Description:
OP-T19-022	@name for ItemClassificationCode	A catalogue must support the name of the Item classification code
OP-T19-024	Base Quantity	A catalogue must support base quantity for the stated price
OP-T19-035	Orderable Unit Factor Rate	A catalogue must support the use of the factor used to convert Base Quantity into Orderable Unit
OP-T19-027	Transaction conditions	A catalogue must support the use of transaction conditions
OP-T19-036	Contract subdivision	A catalogue must support the use of contract subdivision. Used to reference a subsection of a contract
OP-T19-025	Quantity threshold	A catalogue must support the use of threshold for quantity. Used to indicate the threshold quantity for the given price.
OP-T19-026	Quantity ceiling	A catalogue must support the use of quantity ceiling. Used to indicate maximum quantity for given price.

## 6 Code lists

### 6.1 Code lists for coded elements

Table of the code lists used in the Catalogue transaction:

Business Term	Source	Subset	Xpath	listID
Action Code on Line level	<a href="#">CEN BII2</a>		cac:CatalogueLine/cbc:ActionCode	ACTIONCODE:BII2
Action Code on Header Level	PEPPOL		/Catalogue/cbc:ActionCode	ACTIONCODE:PEPPOL <b>Values</b> <b>Add</b> – Used when a catalogue is sent for the first time to the Catalogue Receiver. <b>Replace</b> – Replaces the entire catalogue referring to the contract. <b>Update</b> – Updates a current catalogue. <b>Delete</b> – Deletes a current catalogue.
Country Code	<a href="#">ISO 3166-1 alpha2</a>		cac:Country/cbc:Identificationcode	ISO3166-1:Alpha2
Unit Of Measure	<a href="#">UN/ECE Rec 20</a>		@unitCode cbc:OrderableUnit	UNECERec20 Note: Use this list identifier in the attribute unitCodeListID
Package Level Code	GS1 7009	PEPPOL	cbc:PackageLevelCode	GS17009:PEPPOL <b>Values</b> <b>CU</b> – Base Unit level <b>DU</b> – Pallet level <b>TU</b> – Case level <b>HN</b> – Handling Unit
UNDG Code	<a href="#">UN EDIFACT 8273</a>		cbc:UNDGCode	UNCL8273
Transport Handling Unit Type Code	<a href="#">UN/ECE Rec 21</a>		cbc:TransportHandlingUnitTypeCode	UNECERec21
Currency Code	<a href="#">ISO 4217</a>		@currencyID	ISO4217 Note: Do not validate list identifier.

### 6.1.2 Code lists for identifier schemes

The table of the code lists below describes constraints for the values of schemeID for identifiers in the Catalogue transaction. schemeID indicates what type of identifier is used (for example the type of numbering system) **(Mandatory)**

Business Term	Allowed SchemeID	Applicable Xpath	Note
Party Identifier	See "PEPPOL Policy for using Identifiers"	cbc:EndpointID/@schemeID cac:PartyIdentification/cbc:ID/@schemeID	Check allowed scheme identifiers
Attribute Identifier	<a href="#">UNCL6313</a>	cbc:AttributeID	Check the scheme identifier is UNCL6313 and the attribute identifiers belong to the list.
Tax Category Identifier	Use <a href="#">UNECE5305 CEN BII2</a> subset.	cac:ClassifiedTaxCategory/cbc:ID	Note: Validate the ID with the code list provided by CEN BII2. SchemeID attribute must be UNCL5305

## 7 Business Rules

### 7.1 Catalogue business rules

Rule ID	Rule	error level
BII2-T19-R001	A catalogue MUST have a customization identifier	fatal
BII2-T19-R002	A catalogue MUST have a profile identifier	fatal
BII2-T19-R003	A catalogue MUST contain the date of issue	fatal
BII2-T19-R004	A catalogue MUST contain the catalogue document identifier	fatal
BII2-T19-R006	A validity period end date MUST be later or equal to a validity period start date if both validity period end date and validity period start date are present	fatal
BII2-T19-R007	The party providing the catalogue MUST be specified	fatal
BII2-T19-R008	The party receiving the catalogue MUST be specified	fatal
BII2-T19-R009	A catalogue MUST have maximum one catalogue supplier	fatal
BII2-T19-R010	A catalogue provider MUST contain the full name or an identifier	fatal
BII2-T19-R011	A catalogue receiver MUST contain the full name or an identifier	fatal
BII2-T19-R012	A catalogue supplier MUST contain the full name or an identifier	fatal
BII2-T19-R013	A catalogue customer MUST contain the full name or an identifier	fatal
BII2-T19-R015	Prices of items MUST not be negative	fatal
BII2-T19-R017	Catalogue line validity period MUST be within the range of the whole catalogue validity period	warning
BII2-T19-R018	Price validity period MUST be within the range of the whole catalogue line validity period	warning
BII2-T19-R019	An item in a catalogue line SHOULD have a name	warning
BII2-T19-R020	An item in a catalogue line MUST be uniquely identifiable by at least one of the following: - Catalogue Provider identifier - Standard identifier	fatal
BII2-T19-R021	Standard Identifiers SHOULD contain the Schema Identifier (e.g. GTIN)	warning
BII2-T19-R022	Classification codes SHOULD contain the Classification scheme Identifier (e.g. CPV or UNSPSC)	warning
BII2-T19-R023	A catalogue MUST have at least one catalogue line	fatal
BII2-T19-R024	A catalogue line MUST contain a unique line identifier	fatal
BII2-T19-R026	Orderable quantities MUST be greater than zero	fatal
BII2-T19-R027	An item property data name MUST specify a data value	fatal
BII2-T19-R029	Maximum quantity MUST be greater than zero	warning
BII2-T19-R030	Minimum quantity MUST be greater than zero	warning
BII2-T19-R031	Maximum quantity MUST be greater or equal to the Minimum quantity	warning
EUGEN-T19-R043	An endpoint identifier MUST have a scheme identifier attribute	fatal
EUGEN-T19-R044	A party identifier MUST have a scheme identifier attribute	fatal

Rule ID	Rule	error level
EUGEN-T19-R045	A catalogue line action code MUST have a list identifier attribute "ACTIONCODE:BII2"	fatal
EUGEN-T19-R046	A catalogue header action code MUST have a list identifier attribute "ACTIONCODE:PEPPOL"	fatal
EUGEN-T19-R047	A country identification code MUST have a list identifier attribute "ISO3166-1:Alpha2"	fatal
EUGEN-T19-R048	A unit code attribute MUST have a unit code list identifier attribute "UNECERec20"	fatal
EUGEN-T19-R049	A classified tax category identifier MUST have a scheme identifier attribute "UNCL5305"	fatal
EUGEN-T19-R050	A package level code MUST have a list identifier attribute "GS17009:PEPPOL"	fatal
EUGEN-T19-R051	A UNDG code MUST have a list identifier attribute "UNCL8273"	fatal
EUGEN-T19-R053	An attribute identifier MUST have an scheme identifier "UNCL6313"	fatal

## 7.2 Code lists business rules

Rule ID	Rule	Error level
CL-T19-001	The action code for a catalogue line MUST be Add, Update or Delete if present	fatal
CL-T19-002	For Mime code in attribute use MIME Media Type	fatal
CL-T19-004	Tax categories MUST be coded using UN/ECE 5305 code list	fatal
OP-T19-001	Country codes in a catalogue MUST be coded using ISO code list 3166-1 alpha2	fatal
OP-T19-002	Unit code MUST be coded according to the UN/ECE Recommendation 20	fatal
OP-T19-003	UNDG MUST be coded according to the UN EDIFACT 8273 code list	fatal
OP-T19-005	An Endpoint Identifier Scheme MUST be from the list of PEPPOL Party Identifiers.	fatal
OP-T19-006	An Party Identifier Scheme MUST be from the list of PEPPOL Party Identifiers	fatal
OP-T19-007	An action code at header level MUST be from the PEPPOL action code list.	fatal
OP-T19-008	A package level code MUST be from the PEPPOL subset of GS1 7009 code list.	fatal
OP-T19-009	An attribute identifier MUST be from the UN EDIFACT 6313 code list.	fatal
OP-T19-010	Orderable unit code MUST be coded according to the UN/ECE Recommendation 20	fatal
OP-T19-011	Currency ID MUST be coded using ISO code list 4217	fatal
OP-T19-012	languageID MUST be coded using ISO code list 639-1	fatal
OP-T19-013	A Party Company Identifier Scheme MUST be from the list of PEPPOL Party Identifiers	fatal

## 8 Differences between this specification and BII2 and Svekatalog 1

### 8.1 Features added as extensions or changes to BII2

Restrictions made in form of new business rules are not listed in this section, for these we refer to chapter 7 and the Conformance statement document. Descriptions of the new requirements are found in chapter 5.3.

Business term	Svekatalog 1->2	Requested by	UBL binding
Contracted item indicator	In Svekatalog 1	Sweden	Catalogue/cac:CatalogueLine/cac:Item/cac:TransactionConditions/ cbc:ActionCode. ActionCode="CT" Contracted item indicator
Contract subdivision	New	Denmark	Used to reference subsection of contract Catalogue/cac:CatalogueLine/cbc:ContractSubdivision
External item specifications type	New	Norway	Catalogue/cac:CatalogueLine/cac:Item/cac:ItemSpecificationDocumentReference/cbc :DocumentTypeCode. Changed from cbc:DocumentDescription in BII.
Maximum storage humidity	In Svekatalog 1	Sweden	Catalogue/cac:CatalogueLine/cac:Item/cac:Dimension/cbc:MaximumMeasure.
Minimum storage humidity	In Svekatalog 1	Sweden	Catalogue/cac:CatalogueLine/cac:Item/cac:Dimension/cbc:MinimumMeasure.
Package volume	In Svekatalog 1	Sweden	Catalogue/cac:CatalogueLine/cac:Item/cac:Dimension/cbc:Measure AttributeID=ABJ
Package net weight exact	In Svekatalog 1	Sweden	Catalogue/cac:CatalogueLine/cac:Item/cac:Dimension/cbc:Measure AttributeID=AAF
Package net weight approximately	In Svekatalog 1	Sweden	Catalogue/cac:CatalogueLine/cac:Item/cac:Dimension/cbc:Measure AttributeID=AAL
Dimension description	In Svekatalog 1	Sweden	Catalogue/cac:CatalogueLine/cac:Item/cac:Dimension/cbc:Description
Brand Name	In Svekatalog 1	Sweden	Catalogue/cac:CatalogueLine/cac:Item/cbc:BrandName
General payment condition	New	Italy	Catalogue cac:TradingTerms/cbc:Information
Minimum quantity guaranteed for delivery	New	Italy	Catalogue/cac:CatalogueLine/cac:Itemcac:AdditionalItemProperty/ cbc:ValueQuantity
Contact Person ID	New	Norway	Catalogue/cac:ContractorCustomerParty/cac:Party/cac:Contact/cbc:ID
@name for ItemClassificationCode	In Svekatalog 1	Sweden	Catalogue/cac:CatalogueLine/cac:Item/cac:CommodityClassification/ cbc:ItemClassificationCode/@name
Base Quantity	In Svekatalog 1	Sweden	Catalogue/cac:CatalogueLine/cac:RequiredItemLocationQuantity/cbc:BaseQuantity
Orderable Unit Factor Rate	New	Denmark	Catalogue/cac:CatalogueLine/cac:RequiredItemLocationQuantity/ cac:Price/cbc:OrderableUnitFactorRate. Factor to convert Base Quantity to an Orderable Unit.
Quantity threshold	In Svekatalog 1	Sweden	Catalogue/cac:CatalogueLine/cac:RequiredItemLocationQuantity/cbc:MinimumQuantity
Quantity ceiling	In Svekatalog 1	Sweden	Catalogue/cac:CatalogueLine/cac:RequiredItemLocationQuantity/cbc:MaximumQuantity
Transaction conditions	In Svekatalog 1	Sweden	Catalogue/cac:CatalogueLine/cac:Item/cac:TransactionConditions/ cbc:ID and cbc:ActionCode ActionCode="VQ": Variable measure indicator ActionCode="RC": Returnable unit, indicator ActionCode="SER": Trade item is a service ActionCode="MTO": Trade item is produced after it has been ordered
Party Legal Entity for provider	New	Denmark	Catalogue/cac:ProviderParty/cac:PartyLegalEntity
Postal Address for Provider	New	Denmark	Catalogue/cac:ProviderParty/cac:PostalAddress
Party Legal Entity for Receiver	New	Denmark	Catalogue/cac:ReceiverParty/cac:PartyLegalEntity
Postal address for Receiver	New	Denmark	Catalogue/cac:ReceiverParty/cac:PostalAddress

Business term	Svekatalog 1->2	Requested by	UBL binding
Issue date for referenced contract	New	Denmark	Catalogue/cac:ReferencedContract/cbc:IssueDate
Issuer Party name for certificate	New	Common	Catalogue/cac:CatalogueLine/cac:Item/cac:Certificate/cac:IssuerParty/ cac:PartyName. Composite element IssuerParty is mandatory in UBL.
DocumentTypeCode for certificate	New	Common	Catalogue/cac:CatalogueLine/cac:Item/cac:Certificate/ cbc:CertificateTypeCode. Certificate Type Code is mandatory in UBL.
Consumable Unit Quantity	New	Common	Changed UBL binding to: Catalogue/cac:CatalogueLine/cac:CatalogueItem/cbc:PackingSizeNumeric
Validity period for Price	In Svekatalog 1	Sweden	Changed UBL binding to: Catalogue/cac:CatalogueLine/cac:RequiredItemLocationQuantity/ cac:Price/cac:ValidityPeriod
Item Net quantity	New	Common	Changed UBL binding to: Catalogue/cac:CatalogueLine/cbc:ContentUnitQuantity
ExtendedID	Not in Svekatalog 1	Common	Removed element Catalogue/cac:CatalogueLine/cac:Item/ cac:SellersItemIdentification/cbc:ExtendedID to be in compliance with other BIS documents.
Catalogue name	New		Catalogue/cbc:Name
Catalogue version	New		Catalogue/cbc:VersionID
Contract Issue date	New		Catalogue/cac:ReferencedContract/cbc:IssueDate
Provider Party Electronic address ID	New		Catalogue/cac:ProviderParty/cbc:EndpointID
Provider Party Postal Address	New		Catalogue/cac:ProviderParty/ cbc:StreetName cbc:AdditionalStreetName cbc:CityName cbc:PostalZone cbc:CountrySubentity cac:Country cbc:IdentificationCode
Provider legal registration name Provider legal registration identifier  Provider legal registration city Provider legal registration country	New		Catalogue/cac:ProviderParty/ cac:PartyLegalEntity/ cbc:RegistrationName cbc:CompanyID cac:RegistrationAddress cbc:CityName cac:Country cbc:IdentificationCode
Receiver Party Electronic address ID	New		Catalogue/cac:ReceiverParty/cbc:EndpointID
Receiver Party Postal Address	New		Catalogue/cac: ReceiverParty/cac:PostalAddress/ cbc:StreetName cbc:AdditionalStreetName cbc:CityName cbc:PostalZone cbc:CountrySubentity cac:Country/ cbc:IdentificationCode
Receiver legal registration name Receiver legal registration identifier  Receiver legal registration city Receiver legal registration country	New		Catalogue/cac: ReceiverParty/ cac:PartyLegalEntity/ cbc:RegistrationName cbc:CompanyID cac:RegistrationAddress cbc:CityName cac:Country/ cbc:IdentificationCode
Seller Supplier Party	New		

Business term	Svekatalog 1->2	Requested by	UBL binding
Seller Supplier Party Electronic address ID	New		Catalogue/cac: SellerSupplierParty /cac:Party/cbc:EndpointID
Seller Supplier Party Party identifier	New		Catalogue/cac: SellerSupplierParty /cac:Party/cac:PartyIdentification/cbc:ID
Seller Supplier Party Party name	New		Catalogue/cac: SellerSupplierParty /cac:Party/cac:PartyName/cbc:Name
Seller Supplier Party Postal Address	New		Catalogue/cac: SellerSupplierParty/cac:PostalAddress/cbc:StreetName cbc:AdditionalStreetName cbc:CityName cbc:PostalZone cbc:CountrySubentity cac:Country/cbc:IdentificationCode
Seller Supplier Party Contact Contact person name Contact telephone number Contact fax number Contact email address	New		Catalogue/cac: SellerSupplierParty/cac:Contact/cbc:Name cbc:Telephone cbc:Telefax cbc:ElectronicMail
Contractor Customer Party	New		
Contractor Customer Party Electronic address ID	New		Catalogue/cac: ContractorCustomerParty /cac:Party/cbc:EndpointID
Contractor Customer Party Party identifier	New		Catalogue/cac: ContractorCustomerParty/cac:Party/cac:PartyIdentification/cbc:ID
Contractor Customer Party Party name	New		Catalogue/cac: ContractorCustomerParty/cac:Party/cac:PartyName/ cbc:Name
Seller Supplier Party Postal Address	New		Catalogue/cac: ContractorCustomerParty/cac:PostalAddress/cbc:StreetName cbc:AdditionalStreetName cbc:CityName cbc:PostalZone cbc:CountrySubentity cac:Country/cbc:IdentificationCode
Contractor Customer Party Contact Contact ID Contact person name Contact telephone number Contact fax number Contact email address	New		Catalogue/cac: ContractorCustomerParty/cac:Contact/cbc:ID cbc:Name cbc:Telephone cbc:Telefax cbc:ElectronicMail
General payment conditions	New		Catalogue/cac:TradingTerms/cbc:Information
Orderable unit	New place for T0137		Catalogue/cac:CatalogueLine/cbc:OrderableUnit
OBS Inte helt klar.			

## 8.2 Features changed between Svekatalog 1 and Svekatalog 2.

Restrictions made in form of new business rules are not listed in this section, for these we refer to chapter 7 and the Conformance statement document. Descriptions of the new requirements are found in chapter 5.3.

Business term	Requested by	UBL binding
Contracted item indicator	Sweden	Catalogue/cac:CatalogueLine/cac:Item/cac:TransactionConditions/ cbc:ActionCode. ActionCode="CT" Contracted item indicator

## 9 Process and typical scenarios

### 9.1 Use case 1 – New Catalogue

This use case includes a simple catalogue containing mandatory information and information required to get a high performance from the buyers search engine. The catalogue contains both products and services. This is the first catalogue to the receiver.

<b>Use Case No</b>	1
<b>Use Case Name</b>	A new catalogue from the Seller.
<b>Use Case Description</b>	The provider sends a catalogue to the receiver. The catalogue contains the articles that the buyer and seller have agreed on in a contract. This is the first catalogue being sent on this contract.
<b>Parties involved</b>	Catalogue Provider (same legal entity as the Supplier/Seller in this use case) Catalogue Receiver (same legal entity as the Customer/Buyer in this use case)
<b>Assumptions</b>	<ol style="list-style-type: none"> <li>1. The Seller and the Buyer have a contract of products and services that the buyer may purchase from the Seller.</li> <li>2. The parties have agreed to exchange the catalogue message</li> <li>3. The articles are <ol style="list-style-type: none"> <li>a. Physical articles (pens and papers)</li> <li>b. Fruits</li> <li>c. Services</li> </ol> </li> </ol>
<b>The flow</b>	<ol style="list-style-type: none"> <li>1. The Seller identifies the contracted items</li> <li>2. The Provider creates a Catalogue message</li> <li>3. The Provider sends the message to the Receiver</li> <li>4. The Buyer verifies the content in the message consider to accept or reject the catalogue.</li> <li>5. Assuming that the Catalogue is accepted, the Buyer inserts the articles from the catalogue message in the local ERP-system.</li> </ol>
<b>Result</b>	<ol style="list-style-type: none"> <li>1. The Buyer have all the articles and the contracted prices in the ERP-system and may start ordering</li> <li>2. The ordering process is easy when you have all necessary information in the ERP-system. <i>Please note that the ordering process is not part of this specification. For ordering, please see Sveorder BIS 28A.</i></li> </ol>
<b>XML example file</b>	See Annex A for sample Catalogue file illustrating Use Case 1.

### 9.2 Use case 2 – Catalogue update and rejection

This is an **Update** of the catalogue based on Use case 1.

<b>Use Case No</b>	2
<b>Use Case Name</b>	Catalogues update from the provider and reject from the receiver.
<b>Use Case Description</b>	The provider sends a catalogue update to the receiver. The catalogue contains changes in the previous catalogue. After receiving the catalogue, the buyer rejects the catalogue by contacting the supplier.
<b>Parties involved</b>	Catalogue Provider (same legal entity as the Supplier/Seller in this use case) Catalogue Receiver (same legal entity as the Customer/Buyer in this use case)
<b>Assumptions</b>	<ol style="list-style-type: none"> <li>1. The Seller has previously sent a catalogue to the Buyer.</li> </ol>

	<ol style="list-style-type: none"> <li>2. The Seller wants to update the catalogue <ol style="list-style-type: none"> <li>a. One article is updated (GTIN is added)</li> <li>b. One new article is added</li> <li>c. One article is deleted</li> </ol> </li> </ol>
<b>The flow</b>	<ol style="list-style-type: none"> <li>1. The Seller identifies the items to be in the Catalogue update</li> <li>2. The Provider creates a Catalogue message</li> <li>3. The Provider sends the message to the Receiver</li> <li>4. The Buyer verifies the content in the message and considers to accept or reject the catalogue.</li> <li>5. In this Use case the Buyer has reason to reject the catalogue. The Buyer initiates a dialogue to resolve the matter, but the process to be used falls outside of the scope of this document.</li> </ol>
<b>Result</b>	<ol style="list-style-type: none"> <li>1. The Buyer did not insert the changes in the ERP-system</li> <li>2. The Seller needs to correct the information in his ERP-system.</li> </ol>
<b>XML example file</b>	See Annex A for sample Catalogue file illustrating Use Case 2.

### 9.3 Use case 3 – Replace of catalogue

This is a **Replace** of the catalogue based on Use case 1 and 2.

<b>Use Case No</b>	3
<b>Use Case Name</b>	Catalogues replace.
<b>Use Case Description</b>	<p>The provider sends a catalogue replace to the receiver.</p> <p>The catalogue contains all the contracted items and replaces the previous accepted catalogue.</p>
<b>Parties involved</b>	<p>Catalogue Provider (same legal entity as the Supplier/Seller in this use case)</p> <p>Catalogue Receiver (same legal entity as the Customer/Buyer in this use case)</p>
<b>Assumptions</b>	<ol style="list-style-type: none"> <li>1. The Seller has previously sent a new catalogue to the Buyer which has been accepted.</li> <li>2. The Seller has sent an update of the catalogue which was rejected via a non-structured e-mail by the buyer</li> <li>3. The Seller sends a replace catalogue <ol style="list-style-type: none"> <li>a. All articles that the supplier has identified in the contract, including the new one in the rejected catalogue.</li> <li>b. One article from the previous accepted catalogue is not in this catalogue.</li> <li>c. Three more new articles are added. Shampoo presented in a hierarchy.</li> </ol> </li> </ol>
<b>The flow</b>	<ol style="list-style-type: none"> <li>1. The Seller identifies the items to be in the Catalogue replace</li> <li>2. The Provider creates a Catalogue message</li> <li>3. The Provider sends the message to the Receiver</li> <li>4. The Buyer verifies the content in the message and accepts the catalogue (no message is sent).</li> </ol>
<b>Result</b>	<ol style="list-style-type: none"> <li>1. The Buyer has all the articles and the contracted prices in the ERP-system and may start ordering</li> <li>2. The ordering process is easy when you have all necessary information in the ERP-system. <i>Please note that the ordering process is not part of this specification. For ordering, please see Sveorder BIS 2&amp;A.</i></li> </ol>
<b>XML example file</b>	See Annex A for sample Catalogue file illustrating Use Case 3.

## 9.4 Use case 4 – Catalogue deletion

This is a **Deletion** of the catalogue based on Use case 3.

<b>Use Case No</b>	4
<b>Use Case Name</b>	Catalogue deletion.
<b>Use Case Description</b>	The provider sends a catalogue deletion to the receiver. The catalogue deletes the previous catalogue.
<b>Parties involved</b>	Catalogue Provider (same legal entity as the Supplier/Seller in this use case) Catalogue Receiver (same legal entity as the Customer/Buyer in this use case)
<b>Assumptions</b>	<ol style="list-style-type: none"> <li>1. The Seller has previously sent a catalogue to the Buyer.</li> <li>2. The Seller and the Buyer have ended their contract</li> </ol>
<b>The flow</b>	<ol style="list-style-type: none"> <li>1. The Seller identifies the current active catalogue to be deleted</li> <li>2. The Provider creates a Catalogue message</li> <li>3. The Provider sends the message to the Receiver</li> <li>4. The Buyer verifies the content in the message.</li> <li>5. The Buyer, in his ERP system, deactivates the items identified in the catalogue message.</li> </ol>
<b>Result</b>	<ol style="list-style-type: none"> <li>1. The Buyer can no longer make an order to the supplier from this catalogue.</li> </ol>
<b>XML example file</b>	See Annex A for sample Catalogue file illustrating Use Case 4.

## 9.5 Use case 5 – Catalogue with all possible information and positive response

This is an Update of a previous sent catalogue and not based on any of the other use cases. The catalogue includes all possible information in a catalogue using this specification. Some information may not be relevant, but is in the catalogue for giving an example.

<b>Use Case No</b>	5
<b>Use Case Name</b>	Catalogue with all information.
<b>Use Case Description</b>	The provider sends a catalogue update to the receiver.
<b>Parties involved</b>	Catalogue Provider Supplier/Seller Catalogue Receiver Customer/Buyer
<b>Assumptions</b>	<ol style="list-style-type: none"> <li>1. The Seller has previously sent a catalogue to the Buyer.</li> <li>2. The Seller needs to send a new article to update the previous catalogue.</li> </ol>
<b>The flow</b>	<ol style="list-style-type: none"> <li>1. The Seller identifies the article to be added</li> <li>2. The Provider creates a Catalogue message</li> <li>3. The Provider sends the message to the Receiver</li> <li>4. The Buyer verifies the content in the message and considers the catalogue acceptable.</li> <li>5. The Buyer inserts/updates the information from the catalogue message in the local ERP-system.</li> </ol>
<b>Result</b>	<ol style="list-style-type: none"> <li>1. The Buyer has the articles and the contracted prices in the ERP-system and may start ordering</li> </ol> <p><i>Please note that the ordering process is not part of this Specification. For ordering, please see Sveorder BIS 28A.</i></p>
<b>XML example file</b>	See Annex A for sample Catalogue file illustrating Use Case 5.

## 10 Description of selected parts of the catalogue message

### 10.1 Parties

The following parties/roles may be specified in the message:

#### 10.1.1 Catalogue Provider (ProviderParty)

The party that is responsible for the preparation and transfer of the Catalogue to the Catalogue receiver. Can be the Supplier itself or a third party providing this service.

Example:

```
<cac:ProviderParty>
  <cbc:EndpointID schemeID="GLN">5790000436125</cbc:EndpointID>
  <cac:PartyIdentification>
    <cbc:ID schemeID="NO:ORGNR">968993038</cbc:ID>
  </cac:PartyIdentification>
  <cac:PartyName>
    <cbc:Name>Office AS</cbc:Name>
  </cac:PartyName>
</cac:ProviderParty>
```

#### 10.1.2 Catalogue Receiver (ReceiverParty)

The party that is responsible for the reception and control of the Catalogue. Can be the Customer itself or a third party providing this service to the Customer.

Example:

```
<cac:ReceiverParty>
  <cbc:EndpointID schemeID="NO:ORGNR">991825827</cbc:EndpointID>
  <cac:PartyIdentification>
    <cbc:ID schemeID="NO:ORGNR">991825827</cbc:ID>
  </cac:PartyIdentification>
  <cac:PartyName>
    <cbc:Name>DIFI</cbc:Name>
  </cac:PartyName>
</cac:ReceiverParty>
```

#### 10.1.3 Supplier (SellerSupplierParty)

The party that is responsible for the delivery of products or services specified in the Catalogue.

Example:

```
<cac:SellerSupplierParty>
  <cac:Party>
    <cac:PartyName>
      <cbc:Name>Office AS</cbc:Name>
    </cac:PartyName>
    <cac:PostalAddress>
      <cbc:StreetName>Office street 12</cbc:StreetName>
      <cbc:CityName>oslo</cbc:CityName>
      <cbc:PostalZone>1163</cbc:PostalZone>
      <cbc:CountrySubentity>Oslo</cbc:CountrySubentity>
      <cac:Country>
        <cbc:IdentificationCode listID="ISO3166-1:Alpha2">NO</cbc:IdentificationCode>
      </cac:Country>
    </cac:PostalAddress>
    <cac:Contact>
      <cbc:ElectronicMail>kontor@online.no</cbc:ElectronicMail>
    </cac:Contact>
```

```

</cac:Party>
</cac:SellerSupplierParty>

```

#### 10.1.4 Buyer (ContractorCustomerParty)

The party buying products or services from the Catalogue.

Example:

```

<cac:ContractorCustomerParty>
  <cac:Party>
    <cbc:EndpointID/>
    <cac:PartyIdentification>
      <cbc:ID schemeID="DK:CVR">DK16356706</cbc:ID>
    </cac:PartyIdentification>
    <cac:PartyName>
      <cbc:Name>DIGST</cbc:Name>
    </cac:PartyName>
    <cac:Contact>
      <cbc:ElectronicMail>postmottak@digst.dk</cbc:ElectronicMail>
    </cac:Contact>
  </cac:Party>
</cac:ContractorCustomerParty>

```

#### 10.1.5 Manufacturer (ManufacturerParty)

The name of the Manufacturer.

Example:

```

<cac:ManufacturerParty>
  <cac:PartyName>
    <cbc:Name>FICTIVE INDUSTRY INC</cbc:Name>
  </cac:PartyName>
</cac:ManufacturerParty>

```

## 10.2 Other key elements

### 10.2.1 Action code

The Action code holds instructions about the treatment of the Catalogue by the recipients system. The Action code can be stated either on header or line level. Please be aware that the below mentioned are codes, and hence the correct use of upper and lower case must be used. Example: Replace is valid, REPLACE is not valid.

Legal codes on Catalogue header level:

- Add – Used when a catalogue is sent for the first time to the Catalogue Receiver referring to the contract in the header of the catalogue.
- Replace – Replaces the entire catalogue referring to the contract. This is the default action.
- Update – Updates a current catalogue.
- Delete – deletes the entire catalogue

Example : `<cbc:ActionCode listID="ACTIONCODE:PEPPOL">Replace</cbc:ActionCode>`

Legal codes on Catalogue Line level:

- Add – Used to add items to the catalogue.
- Update – Used to update an item. The entire Catalogue Line is updated. Only used if Action code on header level is Update
- Delete – Used to delete an entire Catalogue line. Only used if Action code on header level is Update.

It is important to note that when updating or deleting on line level, the key identifier is the item ID (sellers item identification or standard item identification, see chapter 10.2.2.), not the line ID. If CatalogueLineReference is

used in the corresponding order message (outside scope of this BIS), the numbering of Line ID must be consistent in all versions of the catalogue.

Example:

```
<cbc:ActionCode listID="ACTIONCODE:BII2">Update</cbc:ActionCode>
```

### 10.2.2 Item identification

Item identification must be sent using the identifiers described below.

- Sellers item identification
- Standard item identification, e.g. GTIN
- Manufacturers item identification which is necessary when the same product is bought from several suppliers.

Either Sellers item identification or Standard item identification must be sent. Manufacturer's item identification shall be sent if available. Which identifier to use depends on what is known at the time of catalogue exchange or what is commonly used in the relevant business sector.

Example 1, Sellers item identification:

```
<cac:SellersItemIdentification>
  <cbc:ID>2451015</cbc:ID>
</cac:SellersItemIdentification>
```

Example 2, Standard item identification:

```
<cac:StandardItemIdentification>
  <cbc:ID schemeID="GTIN">05790000436040</cbc:ID>
</cac:StandardItemIdentification>
```

### 10.2.3 Hazardous item

If an item is classified as Hazardous item, a reference to the relevant UNDG-code must be stated and further specification must be provided in an attached document or on a web-site (URI).

Example:

```
<cac:HazardousItem>
  <cbc:UNDGCode listID="UNCL8273">3265</cbc:UNDGCode>
</cac:HazardousItem>
```

### 10.2.4 Item name and description

The Item name shall be sent in tag <Item/Name> on line level. It is the short description of an item commonly used in ERP-systems. An item name should make it possible for the user to distinguish between similar items. The Item name is often sent in the order from buyer to seller. The field length could be an agreement between parties, to make sure the supporting systems can handle the length.

<Item/Description> is used to provide additional relevant description of the item, in free text.

Example:

```
<cac:Item>
  <cbc:Description> Ballpoint pen, comes in different colours and tip sizes</cbc:Description>
  <cbc:PackQuantity unitCode="CT" unitCodeListID="UNECERec20">10</cbc:PackQuantity>
  <cbc:Name> Ballpoint pen. Blue colour 0.7 mm</cbc:Name>
</cac:Item>
```

### 10.2.5 Classification

An item may be classified according to UNSPSC being the mandatory public classification schemes in some countries/sectors. Products can also be classified according to regulatory schemes or classification schemes used in certain business sectors. The type of classification shall be stated in the attribute "listID". In some cases there is a need to add the name of the Item classification Code by using the attribute "name"

Example:

```
<cac:CommodityClassification>
  <cbc:ItemClassificationCode listID="UNSPSC">44121701</cbc:ItemClassificationCode>
</cac:CommodityClassification>
```

### 10.2.6 Keyword

Keywords are sent to let the Buyer search for an item without knowing the item identification or name. Keywords tag can be repeated (0..n), but the number should be limited to ensure correct handling in the receiving system.

It is also possible to send several keywords in the same tag, by using a separator between the different keywords. Which separator that should be used, must be agreed between the parties. Example of a separator can be the %-sign, as this is not used anywhere else.

Example of several keywords by using several <KeyWord>-tags:

```
<cac:Item>
  <cbc:Description>Day cream</cbc:Description>
  <cbc:PackQuantity unitCode="EA">50</cbc:PackQuantity>
  <cbc:Name>Ultimate Day cream, 250 ml</cbc:Name>
  <cbc:Keyword>Moisturizer</cbc:Keyword>
  <cbc:Keyword>Balm</cbc:Keyword>
  <cbc:Keyword>Lotion</cbc:Keyword>
  <cac:SellersItemIdentification>
    <cbc:ID>654321</cbc:ID>
  </cac:SellersItemIdentification>
</cac:Item>
```

Example of several keywords using "%" as separator:

```
<cbc:Keyword>write equipment%felt pen</cbc:Keyword>
```

### 10.2.7 Quantities and units

The table below lists quantities and units in the format. To all quantities there must be a legal Unit according to the Code list. For xml-examples for quantities and units, we refer to appendix A, test files.

Element /XPath	Description
/cac:CatalogueLine/cbc:OrderableUnit	Unit code for the line item. Mandatory if the item is orderable. Code according to Code list
/cac:CatalogueLine/cbc:ContentUnitQuantity	Quantity in consumable unit E.g. millilitre in bottle of shampoo.
/cac:CatalogueLine/cbc:OrderQuantityIncrementNumeric	Possible limitation to the number of articles that can be ordered. If the Quantity increment is 6 the

	article must be ordered in a quantity of 6, 12, 18 etc.
/cac:CatalogueLine/cbc:MinimumOrderQuantity	The smallest number of items that can be ordered (most often 1).
/cac:CatalogueLine/cbc:MaximumOrderQuantity	The largest number of items that can be ordered (most often not used).
/cac:CatalogueLine/cac:ItemComparison/cbc:Quantity	Quantity related to Price comparison.
/cac:CatalogueLine/cac:Item/cbc:PackQuantity	Number of items on next lower level, e.g. number of Consumer units in a Trading unit.
/cac:CatalogueLine/cac:Item/cbc:PackSizeNumeric	Number of Consumer units. E.g. number of bottles on a Pallet.

	1 bottle	Case of 6 bottles	Pallet of 18 cases
<b>Line identifier</b>	4	5	6
<b>Supplier Item identifier</b>	1111	111	11
<b>Item Name</b>	Shampoo 250 ml	6x250 ml Shampoo	Shampoo
<b>Orderable unit</b>	EA	CS	PF
<b>Packaging level</b>	CU	TU	DU
<b>Packed units</b>		EA	CS
<b>Packed quantity</b>		6	18
<b>Consumable unit</b>	EA	EA	EA
<b>Consumable unit quantity</b>	1	6	108
<b>ItemNetQuantity</b>	250	1500	27000
<b>Unit</b>	MLT	MLT	MLT
<b>MinimumOrderQuantity</b>	1	1	1
<b>Unit</b>	EA	EA	EA
<b>Component related item Identifier</b>		1111	111
<b>Component related item quantity</b>		6	18

	Pack of 500 sheets paper	Case of 5 packs paper	Pallet of 18 cases coppaper
Line identifier	7	8	9
Supplier Item identifier	A	AA	AAA
Item Name	500 copy paper	5*500 Copy paper	Pallet of paper
Orderable unit	EA	CS	PX
Packaging level	CU	TU	DU
Packed units		EA	EA
Packed quantity		5	18
Consumable unit	EA	EA	EA
Consumable unit quantity	1	5	90
ItemNetQuantity	500	2500	45000
Unit	EA	EA	EA
MinimumOrderQuantity	1	1	1
Unit	EA	EA	EA
Component related item Identifier		A	AA
Component related item quantity		5	18

### 10.2.8 Prices

All prices in the format are related to the article or service within this Catalogue identified by an item identification. The following prices can be stated:

- Net price including all discounts and charges but excluded VAT.
- Item comparison price defining price for a certain quantity. Used for comparing prices for different articles with various quantities.
- Conditional price related to a specific location, validity period or ordered quantity.
- Approximate price. The current price will be set on the order date. Commonly used for fruit, vegetables, fresh fish etc.

Example:

```
<cac:RequiredItemLocationQuantity>
  <cbc:LeadTimeMeasure unitCode="DAY">2</cbc:LeadTimeMeasure>
  <cac:Price>
    <cbc:PriceAmount currencyID="NOK">20.0000</cbc:PriceAmount>
  </cac:Price>
  <cac:DeliveryUnit>
    <cbc:BatchQuantity>1</cbc:BatchQuantity>
    <cbc:ConsumerUnitQuantity unitCode="EA" unitCodeListID="UNECERec20">1
    </cbc:ConsumerUnitQuantity>
  </cac:DeliveryUnit>
</cac:RequiredItemLocationQuantity>
```

#### 10.2.8.1 Prices Types in SFTI (Denna del kan komma att ändras. Gäller placering av kvalificerare)

In Sweden, SFTI has specified different types of prices. This is how it's implementd in Svekatalog 2:

To declare that an item is contracted use:

Catalogue/cac:CatalogueLine/cac:Item/cac:TransactionConditions/cbc:ActionCode.

ActionCode="CT"

Example:

```
<cac:TransactionConditions>
  <cbc:ID>true</cbc:ID>
  <cbc:ActionCode>CT</cbc:ActionCode>
</cac:TransactionConditions>
```

To declare that the price may be changed since the last catalogue (Current price/Aktuellt pris). This may be the case for items where prices changes every day, i.e. vegetables and fresh fish, use:

Catalogue/cac:CatalogueLine/cac:RequiredItemLocationQuantity/cac:Price/cbc:PriceType.

PriceType="CP"

Example:

```
<cac:Price>
  <cbc:PriceAmount currencyID="SEK">124.88</cbc:PriceAmount>
  <cbc:PriceType>CP</cbc:PriceType>
</cac:Price>
```

To declare that a price is due to a campaign (commonly supplier's promotion during a limited period of time):

Catalogue/cac:CatalogueLine/cac:RequiredItemLocationQuantity/cac:Price/cbc:PriceType.

PriceType="PRP"

Example:

```
<cac:Price>
  <cbc:PriceAmount currencyID="SEK">110.00</cbc:PriceAmount>
  <cbc:PriceType>PRP</cbc:PriceType>
</cac:Price>
```

To declare that the price is discounted (supplier's list price – discount):

Catalogue/cac:CatalogueLine/cac:RequiredItemLocationQuantity/cac:Price/cbc:PriceType.

PriceType="DPR"

Example:

```
<cac:Price>
  <cbc:PriceAmount currencyID="SEK">120.88</cbc:PriceAmount>
  <cbc:PriceType>DPR</cbc:PriceType>
</cac:Price>
```

To declare that the price is **not** discounted (it's the supplier's list price):

Catalogue/cac:CatalogueLine/cac:RequiredItemLocationQuantity/cac:Price/cbc:PriceType.

PriceType="LIU"

Example:

```
<cac:Price>
  <cbc:PriceAmount currencyID="SEK">130</cbc:PriceAmount>
  <cbc:PriceType>LIU</cbc:PriceType>
</cac:Price>
```

To declare that the price is not defined and will be set when the item is manufactured:

Catalogue/cac:CatalogueLine/cac:RequiredItemLocationQuantity/cac:Price/cbc:PriceType.

PriceType="BAP"

Example:

```

<cac:Price>
  <cbc:PriceAmount currencyID="SEK">1.00</cbc:PriceAmount>
  <cbc:PriceType>BAP</cbc:PriceType>
</cac:Price>

```

A combination of these gives you different type of prices:

Combination	Meaning
Contracted Item= true Price type not given	Kontraktspris. Contracted Item and contracted price
Contracted Item = true Price type = CP	Aktuellt pris, avtalat. Contracted Item but the price may change.
Contracted Item = false Price type = DPR	Rabatterat listpris. Discounted price. Note: changed compared to Svekatalog 1.
Contracted Item = false Price type = CP	Aktuellt pris, rabatterat. Discounted price but the price may change.
Contracted Item = false Pricetype = LIU	Listpris, Suppliers list price
Contracted Item = true Pricetype = PRP	Kampanjpris för avtalad artikel. Contracted Item and campaign price
Contracted Item = false Pricetype = PRP	Kampanj för ej avtalad artikel. Not contracted Item and campaign price
Contracted Item = false Pricetype = BAP	Pris ej satt, kundorderbaserad artikel. Price is not defined for items that will be manufactured to order.

### 10.2.9 Lead time (ledtid) in SFTI

In PEPPOL BIS 1A Catalogue v4 you find lead time in the term

**Catalogue/cac:CatalogueLine/cac:RequiredItemLocationQuantity/cbc:LeadTimeMeasure** which defines the total time from order to delivery to the described location. This is not used in SFTI.

In SFTI another definition of lead time is used: Number of **days** before the item is ready to be delivered from the suppliers location; it is only used for items not in stock.

In Svekatalog 2 AdditionalItemProperty is used for this purpose where Name is "LeadTime\_ReadyForDelivery\_Days" and Value is the number of days:

Exempel

```

<cac:AdditionalItemProperty>
  <cbc:Name>LeadTime_ReadyForDelivery_Days</cbc:Name>
  <cbc:Value>4</cbc:Value>
</cac:AdditionalItemProperty>

```

### 10.2.10 Item labelling

Information about the items environmental, social, ethical and quality type of labelling.

Example:

```

<cac:Certificate>
  <cbc:ID>NEO</cbc:ID>
  <cbc:CertificateTypeCode>NA</cbc:CertificateTypeCode>
  <cbc:CertificateType>Environment</cbc:CertificateType>
  <cbc:Remarks languageID="no">Den nordiske Svanen</cbc:Remarks>
  <cac:IssuerParty>
    <cac:PartyName>
      <cbc:Name>Den Nordiske Svanen</cbc:Name>
    </cac:PartyName>
  </cac:IssuerParty>
  <cac:DocumentReference>
    <cbc:ID>BAL</cbc:ID>
  </cac:DocumentReference>
</cac:Certificate>

```

### 10.2.11 Related items

Items can be related to each other for ordering or logistic purposes. All related items must also be sent as separate Catalogue lines. Sellers article number is the only permitted type of article number.

Types of relations:

- Products that are bundled and ordered/invoiced together, e.g. bottles and deposits.
- Products that are connected in a product line or a logistics structure, e.g. consumer units and trading units of the same article.
- Accessories that might be sold together with a product, e.g. disk station to a laptop.

Example - The current item consists of 6 of Sellers article number 7690211, and 5 of article 523467:

```

<cac:ComponentRelatedItem>
  <cbc:ID>7690211</cbc:ID>
  <cbc:Quantity>6</cbc:Quantity>
</cac:ComponentRelatedItem>
<cac:ComponentRelatedItem>
  <cbc:ID>523467</cbc:ID>
  <cbc:Quantity>5</cbc:Quantity>
</cac:ComponentRelatedItem>

```

### 10.2.12 Logistics information

The Logistics elements can be used to specify different pack levels for the same item:

- Each pack level is regarded as a unique item and must be sent as a separate Catalogue line and identified with a unique identification such as GTIN.
- Information about pack level is done in the element PackLevelCode on line level. The Pack level codes are based on the Edifact/Eancom-standard and the following codes are available:
  - DU = Dispatch Unit
  - HN = Handling Unit (level between TU and DU).
  - TU = Traded Unit
  - CU = Consumer Unit
- It should be stated if the pack level is orderable.
- The relation between pack levels should be specified by using Component Related Item, e.g. that a Dispatch unit contains Traded units. For the higher level Packed Quantity should be used.

Example:

```
<cbc:PackLevelCode listID="GS17009:PEPPOL">TU</cbc:PackLevelCode>
```

### 10.2.13 Dimension

Physical properties are important for logistics. The following values can be stated:

- Height (HT)
- Width (WD)
- Length (LN)
- Weight (WT)
- Net Volume (AAX)

For some items it is important to inform about storage regulations. The following values can be stated:

- Temperature
- Humidity

Example:

```
<cac:Dimension>
  <cbc:AttributeID schemeID="UNCL6313">HT</cbc:AttributeID>
  <cbc:Measure unitCode="MMT">270</cbc:Measure>
</cac:Dimension>
<cac:Dimension>
  <cbc:AttributeID schemeID="UNCL6313">LN</cbc:AttributeID>
  <cbc:Measure unitCode="MMT">300</cbc:Measure>
</cac:Dimension>
```

### 10.2.14 Additional properties

Additional properties are meant for product properties that cannot be sent in any of the defined elements in this specification. Additional properties consist of the Name of the property and the actual Value.

Example of additional properties:

- Color
- Allergens.  
Legal values: YES, NO, UNKNOWN, FREE.
- Nutrition.  
Stated with amount per 100 g/ml.
- Genetically modified.  
Legal values: True, False

```
<cac:AdditionalItemProperty>
  <cbc:Name>Color</cbc:Name>
  <cbc:Value>Red</cbc:Value>
  <cbc:ValueQualifier>Color</cbc:ValueQualifier>
</cac:AdditionalItemProperty>
```

### 10.2.15 Replaced item

Replaced item is used to identify an existing item being replaced by an item in this Catalogue.

```
<cac:ReplacedRelatedItem>
```

```
<cbc:ID>12345</cbc:ID>  
<cbc:Quantity unitCode="EA" unitCodeListID="UNECERec20">5</cbc:Quantity>  
</cac:ReplacedRelatedItem>
```

## 11 PEPPOL Identifiers

PEPPOL has defined a “Policy for Using Identifiers” [PEPPOL\_Transp] that specifies how to use identifiers in both its transport infrastructure and within the documents exchanged across that infrastructure. It also introduces principles for any identifiers used in the PEPPOL environment. The following policies apply to this specification:

### 11.1 Party Identifiers

The “schemeID” attribute must be populated in all instances of the “ID” element when used within a “PartyIdentification”-container and in all instances of the “EndpointID” element when used within a “Party”-container.

Example of using GS1 GLN (Global Location Number) as PartyIdentification:

```
<cac:PartyIdentification>
  <cbc:ID schemeID="GLN">4035811991014</cbc:ID>
</cac:PartyIdentification>
```

#### 11.1.1 Using Danish organization number as PartyIdentification

In Denmark parties often are identified by a company organization number. This can be used for all parties.

The following examples denotes that the Issuing Agency is DK:CVR in the PEPPOL set of Issuing Agency Codes. This means that the party has the Danish CVR identifier DK87654321.

Examples of usage in PartyIdentification and Endpoint ID:

```
<cbc:EndpointID schemeID="DK:CVR">DK87654321</cbc:EndpointID>

<cac:PartyIdentification>
  <cbc:ID schemeID="DK:CVR">DK87654321</cbc:ID>
</cac:PartyIdentification>
```

#### 11.1.2 Using Swedish organization number as PartyIdentification

In Sweden parties often are identified by a company organization number. This can be used for all parties.

```
<cac:PartyIdentification>
  <cbc:ID schemeID="SE:ORGNR">5541277711</cbc:ID>
</cac:PartyIdentification>
```

#### 11.1.3 Using Italian VAT number as PartyIdentification

In Italy parties often are identified by the VAT number. This can be used for all parties.

```
<cac:PartyIdentification>
  <cbc:ID schemeID="IT:VAT">IT01234567890</cbc:ID>
</cac:PartyIdentification>
```

### 11.2 Version ID

This specification is using the UBL 2.1 syntax. The namespace of the XML-message does only communicate the major version number. Since it is important for the receiver to also know what minor version of the syntax that is used, the element UBLVersionID must be stated with the value **2.1**:

```
<cbc:UBLVersionID>2.1</cbc:UBLVersionID>
```

### 11.3 Profile ID

The ProfileID identifies the process that the business document is part of. PEPPOL BIS uses the identification system according to BII. As SFTI implements only the Catalogue transaction and not the Catalogue Response, an SFTI-specific suffix has been added the profileID of BII to clearly separate the profiles.

The following process identifier is used for the transactions of this business document:

**ProfileID:** urn:www.cenbii.eu:profile:bii01:ver2.0#urn:www.sfti.se:svekatalog:ver2.0

For implementers: Please note that process identifiers in the document instance MUST correspond to the SMP process identifier.

### 11.4 Customization ID

The PEPPOL Customization ID identifies the specification of content and rules that apply to the transaction.

This business document has required some minor additions and changes to the CEN BII transaction. Following the CEN BII methodology any extension must be communicated by adding an extension ID onto the Customization ID.

The full syntax is:

```
<transactionId>:(restrictive|extended|partly):<extensionId>[(restrictive|extended|partly):<extensionId>].
```

Where:

- ▶ Transaction ID: urn:www.cenbii.eu:transaction:biitrns019:ver2.0
- ▶ Extension ID: urn:www.sfti.se:svekatalog:ver2.0

**CustomizationID to use:**

urn:www.cenbii.eu:transaction:biitrns019:ver2.0:extended:urn:www.sfti.se:svekatalog:ver2.0

Example of usage:

```
<cbc:CustomizationID>
urn:www.cenbii.eu:transaction:biitrns019:ver2.0:extended:urn:www.sfti.se:svekatalog:ver2.0
</cbc:CustomizationID>
```

For implementers: Please note that CustomizationID element in the document instance MUST correspond to the Customization ID of the SMP Document Identifier.

### 11.5 Namespaces

The target namespace for the UBL2.1 Catalogue is:

**urn:oasis:names:specification:ubl:schema:xsd:Catalogue-2**

# 1 XML Schema Guideline and information content
